

Scarborough TEC

The staff and students of Scarborough TEC are enjoying their new Construction & Engineering centre. Part-funded by £3.345m of Local Growth Fund, the building has state-of-the-art workshops that will let students hone their skills with the latest technology.

The funding, which was secured by the York, North Yorkshire and East Riding Enterprise Partnership, has made a vast difference to the college.

“The workshops and equipment the students now have access to are going to give them a competitive edge when it comes to applying for jobs in industry;” said Simon Gummerson, Head of Construction & Engineering at Scarborough TEC.
