

## Karro Foods

Karro Foods in Malton is one of the UK's biggest producers of pork products, processing 45,000 pigs each week to supply the UK market. In order to meet demand, they have recently purchased new processing equipment and secured nearly 300 jobs, 197 of which are newly created.

The developments have been supported by a £600,000 Let's Grow grant, and the additional jobs and training has given a boost to the local community. **"It has made a really positive impact on our business,"** said Karro Foods Executive Chair Di Walker.
